INVENOVA

Designing and equipping Distribution Centers

- ✓ +35 years of experience.
- ✓ +250 global logistics projects.
- ✓ +100 satisfied clients.

WHY ARE WE THE BEST CHOICE?

Solutions that improve operability and maximize the performance of supply chain operations.

Together with our clients, we design, build and implement turnkey projects within distribution centers: sorting systems, material handling, storage, intralogistics, and more.

SORTING SYSTEMS

Our suite of high-capacity solutions for distributing materials to multiple destinations offers you the best solution with excellent ROI.

PICK TO LIGHT

Perfect for many orders and few SKUs.

PUT TO LIGHT

Perfect for many SKUs with a medium number of orders.

PICKING CART

Directed to serve many SKUs with few orders.

TRAY SORTERS

Large quantity of orders with less manpower.

MATERIAL HANDLING

They allow moving and distributing all kinds of materials and large and heavy loads. Ideal for connecting different areas with a constant flow of goods.

MOTORIZED CONVEYOR

Material handling equipment. Its main objective is to move merchandise from one place to another continuously.

GRAVITY CONVEYOR

Material handling equipment is used to move products discontinuously or taking advantage of the force of gravity.

OVERHEAD CONVEYOR

Material handling and storage system for hanging garments. Help sort and organize clothing distribution centers.

TOWLINE / AGV

System designed for the movement of large or heavy loads.

STORAGE

Keep more merchandise in less space, while you have it available for collection and distribution.

MEZZANINE

Metal mezzanine structures that allow efficient use of useful warehouse height. They duplicate the areas where they are installed.

SHELVING / RACKING

Storage system designed for medium and heavy loads.

PASSARELLA

Multi-level storage system, which is mainly used to increase the capacity of a specific area without losing the availability of picking the material for its rapid supply.

AS / RS

Automated systems for the storage of pallets. They are high-density stock systems.

MINI LOADS

Automated systems for the storage of boxes. They are systems for high density and stock availability.

TECHNOLOGY / WES

Make better decisions with detailed information and reports generated from processed data.

WMS

WAREHOUSE MANAGEMENT SYSTEMS

Material tracking system using scanners and barcodes.

WCS

WAREHOUSE CONTROL SYSTEMS

Control program for automation devices within a CEDIS.

RFID SYSTEMS

Information transfer system using antennas and radio frequency labels.

BUSINESS INTELLIGENCE

Information extraction system to centralize it and to be able to make data crosses.

AUTOMATION AND ROBOTICS

Programming of electromechanical devices for the automation of repetitive processes.

FACTS 2021

For 5th year in a row, Invenova broke order processing records for our clients.

RETAIL

8,954,285
orders processed

(4,477 per hour)

E-COMMERCE

5,026,730
orders processed

(2,513 per hour)

SUCCESS STORIES MINISO

Giving an integral solution to the company with the highest growth in points of sale in LATAM for the last 10 years is not an easy feat. They need the best.

WCS to manage and execute the distribution instructions they receive from WMS Manhattan. The information presented by our BI system helps keep production at its peak while keeping errors to a minimum.

PUT TO LIGHT solution with 240 destinations, achieving constant departures of more than 1,000 puts per man-hour.

Motorized and gravity conveyors carry the merchandise throughout the Distribution Center efficiently.

SUCCESS STORIES GRUPO AXO

Controlling a Distribution Center to serve 30 brands and more than 5,000 points of sale, is only achieved with an experienced logistics provider.

This project required specific configurations to serve multiple channels at the same time. The implemented WCS effectively meets the needs and requirements raised from the beginning.

We design and implement a continuous sorting system with Put to Light technology.

We transform a selection process with an efficiency of 70 picks per man-hour to 320 picks per man-hour.

SUCCESS STORIES PART I

We work with international companies and with the most varied needs in logistics solutions.

We designed and assembled the distribution center to store, handle and process all the materials of the Inditex Group brands.

Multi-deck overhead conveyor for storing hanging and flat garments. Productivity increased by 150%

Picking Cart solution to process 20 orders at the same time. Productivity went from 12 picks per man-hour to 160 picks/m-h.

SUCCESS STORIES PART II

We work with companies of international stature and with the most varied needs in logistics solutions.

Support and maintenance of high-performance automatic system. Double-deck tray sorter with side channels, capable of a maximum capacity of more than 20,000 puts per hour.

An ideal overhead conveyor system to process and store, with very high efficiency, hanging, and flat garments.

- 3PL company with various solutions of high throughput for their fulfillment accounts.

INVENOVA

STRATEGIC ALLIANCES

TRUST IN THE EXPERTS

Together we will find the best alternatives to EXPONENTIALLY increase the productivity of your Distribution Center.

Cutting Edge technology application.

Innovative solutions on intralogistics..

Worldwide systems on material movement.

Worldwide classification teams.

Productivity and efficiency through overhead conveyors.
